

LifeSaver Mobile's Solution for Waste Management Fleets

LifeSaver Mobile Customer:

Aspen Waste

Minneapolis, MN

Brian Bengtson, IT Manager

Company Background

Aspen Waste is a waste management company that provides various waste management services to businesses and communities. With a fleet of over 200 vehicles, Aspen Waste's primary focus is to ensure efficient and safe waste collection and disposal. To enhance their operations, Aspen Waste partnered with LifeSaver Mobile to implement their innovative software solution and address the issue of distracted driving within their fleet.

Challenge

Like many waste management companies, Aspen Waste faced the challenge of ensuring employee safety while on the road. With the increasing use of mobile devices and routing tablets, distractions caused by these devices pose a significant risk to road safety. Additionally, the waste management industry typically requires frequent interaction with routing tablets, which could lead to further distraction and collisions.

Solution

To mitigate distraction-related incidents, Aspen Waste turned to LifeSaver Mobile and their 100% software-only solution. LifeSaver Mobile's solution is designed to proactively prevent phone distraction for drivers and, importantly for waste management fleets, minimize unwanted interactions with routing tablets while driving. This solution aligns perfectly with the needs of waste management fleets, where driver focus and safety are paramount.

Implementation and Results:

Aspen Waste's initial pilot phase allowed the company to evaluate the effectiveness of the LifeSaver Mobile solution within their operational environment. The pilot's positive outcome led to Aspen Waste's full-scale rollout of the LifeSaver Mobile solution on over 200 routing tablets.

Feature Enhancement

Aspen Waste was concerned that its drivers would be tempted to interact with the navigation application on their routing tablets. This concern resulted in a unique opportunity for LifeSaver Mobile. The company required a “view-only” mode that allows drivers to view, but not manipulate, their navigation software. LifeSaver Mobile was able to implement this new feature in a very short period of time and now this “view-only” mode is available for all LifeSaver customers.

LifeSaver Mobile allows employees to see but not interact with their navigation software while driving.

If the employee tries to access any other software on the mobile device, LifeSaver Mobile will prevent them from doing so.

Benefits

01

Improved Driver Safety

LifeSaver Mobile's software-only solution ensures that drivers are not distracted by their mobile devices while behind the wheel, reducing the risk of collisions and costly downtime.

02

Enhanced Compliance

By actively preventing unwanted interactions with routing tablets, LifeSaver Mobile helps waste management fleets maintain compliance with safety regulations and align with industry best practices.

03

Operational Efficiency

With LifeSaver Mobile's solution in place, waste management operators can be confident in their drivers' undivided attention on the road, reducing the likelihood of errors or delays in waste collection and disposal.

04

Cost Savings

By preventing collisions and minimizing distractions, waste management companies such as Aspen Waste can reduce insurance claims, vehicle repairs, and potential legal liabilities, leading to significant cost savings in the long run.

Conclusion

Aspen Waste's partnership with LifeSaver Mobile has transformed its fleet operations, providing a 100% software-only solution that proactively prevents mobile distractions and unwanted interactions with routing tablets. The successful deployment of the solution on an initial 40 routing tablets has paved the way for a company-wide rollout, solidifying LifeSaver Mobile as Aspen Waste's solution for distracted driving prevention. With the simple deployment of LifeSaver Mobile on their mobile devices, waste management fleets can proactively prioritize safety, compliance, and operational excellence in their daily operations.

“LifeSaver Mobile is an ‘inexpensive insurance policy’ for Aspen Waste to mitigate mobile device distractions while driving, which is the #1 cause of crashes. It’s a no-brainer!”
